A key player on the European tourist accommodation market, the Odalys Group welcomes over 2 million holidaymakers each year to its 400 sites. Odalys owes this success, built in just 20 years of existence, to a sustained rate of growth and its capacity to understand and integrate the new lifestyles and travel habits of its customers.

Over the coming years, the Odalys Group will accelerate its ambitious development policy. In France first, with a strategy of upgrading its mountain establishments where three new Prestige residences will open by 2022, and the deployment of new interior concepts on the urban and student residence market similar to that of the mobile home campsites. Also internationally with more than 30 openings scheduled by 2025.

In particular, we will continue our diversification policy in the city centre apart’hotel segment (Odalys City), an accommodation offer not available in French-speaking African countries, and the student residence market (Odalys Campus), in response to the lack of student housing in the majority of European university towns.

Two high-potential markets in which the Odalys Group intends to rapidly position itself as a key player with 15 projects already under study in 5 countries and 4 projects signed in Seville (Spain), Lisbon and Porto (Portugal) and Douala (Cameroon) in the coming 3 years.
Building the Group’s future together

Recognised by regional and national promoters for its business expertise and experience in the management and marketing of its accommodation, the Odalys Group is a key partner of communities and local economic life. Involved and committed, our teams pay great attention to the needs of mayors to support the development of their resort, both by the sea and in the mountains, whether in terms of architecture, positioning, capacity or equipment proposed.

Deploying a strategy of plural diversification

In just 20 years, the Odalys Group now ranks number 2 in the European tourist and leisure accommodation market. Odalys owes this success to its ability to understand and integrate the needs, new lifestyles and travelling habits of its customers. This has led the Group over the years to conduct a diversification strategy based on its new brands: Odalys Campus for student residences and Odalys City in the city centre apart’hotel market.

Always looking further ahead

Since the creation and management of its first residences, the Odalys Group has continued to diversify, to conquer new customers such as business travellers or students, to position itself in new segments such as holidays clubs, to raise the level of requirements in terms of services and leisure facilities proposed, and will now push its boundaries by expanding in Europe as well as in French-speaking Africa.

Upgrading our mountain range with the creation of new residences

In order to meet the new expectations of holidaymakers staying in the mountains, the Odalys Group will open several upmarket residences in Les 2 Alpes, Alpe d’Huez and La Rosière before 2022. Large residences favouring an architecture and decoration respectful of local specificities, spacious apartments designed for sharing time with loved ones and real relaxation and leisure areas with swimming pool, fitness area, sauna, steam room and treatment rooms. With this upgrading strategy, the Odalys Group intends, working alongside French ski resorts, to contribute to winning back foreign holidaymakers and increasing appeal to a younger, more demanding clientele with advantages other than the ski area itself.

Accelerated diversification in the student and city markets

By 2025, the Odalys Group will accelerate its development policy in the student residence (Odalys Campus) and city centre apart hotel (Odalys City) markets with the opening of some forty new establishments, including a first business residence at Nice airport in late 2021 where a brand new concept will be unveiled. The Odalys Group’s ambition is to position itself as a key operator in these two high-potential accommodation markets in France and abroad, where the offer is still limited.

Focus on the International market in Europe and French-speaking Africa

The Odalys Group is always looking further ahead and is now preparing to deploy its Odalys Vacances, Odalys City and Odalys Campus brands internationally.

- In Europe, with some twenty openings planned by 2025, with 5 projects already signed including the first Odalys Campus student residence in Spain in Seville (September 2020), Portugal in Lisbon (2021) and Porto (2022).
- In French-speaking Africa, where the Odalys Group intends to rapidly position itself as a key player in the city centre apart’hotel market, with the opening of a first Odalys City residence in Cameroon in Douala by the end of 2022. Two other establishments are already planned in Abidjan (Ivory Coast) and Lomé (Togo) in partnership with our shareholder the Groupe Duval, and more than ten opportunities are being studied in Senegal, Ethiopia, Chad and Guinea.

AN AMBITIOUS AND INTERNATIONAL development

New ambitions, new concepts!

All the interior concepts of the Group’s brands (Odalys Vacances, Odalys City, Odalys Campus and Odalys Plein Air) have been redesigned to meet new consumer expectations and trends in terms of use and design. The communal areas focus on conviviality while the private areas have become more homely while upgrading services. For Odalys Plein Air, a brand new NOMAD concept initiates a new stage in the development of the Group’s outdoor tourist accommodation offer, refocusing on nature, authenticity and a high level of comfort.

For several years now, the Odalys Group has been committed to accelerating its digital transformation in order to respond to the new habits and behaviours of its clients. Various recent projects designed to offer our customers a more immersive, experiential and efficient stay have been implemented, such as its new “mobile-first” website, a new customer service and CRM platform, the optimisation of “user experience” as well as the development of video media and new visuals.

This task has been accompanied by an in-depth redesign of strategic marketing with the deployment of new brand platforms.

A new brand, designed for property owners

As part of its diversification policy, at the end of 2018, the Odalys Group launched a new brand, la Conciergerie by Odalys, a brand new service designed for property owners who rent their apartment or chalet on booking platforms to private customers. Available in a hundred or so destinations where Odalys is already present, valid from spring bookings and including off-season periods, la Conciergerie by Odalys is distinguished by its “À la carte” pricing policy ranging from the simple pack including key collection to more complete packs including inventory, cleaning, bed linen and welcome kit, passing through “À la carte” services such as beds made on arrival, technical assistance or an annual technical check-up.

The Odalys Group will gradually extend this service to other tourist resorts with the ambition of quickly positioning itself as the first concierge service in France.

Enjoy your holiday as soon as you arrive

In more than 100 residences throughout France, Odalys Vacances now offers a new online check-in service allowing guests, on the day of arrival, to collect keys directly in the apartment without having to go via the reception and to start to enjoy their holidays immediately. To benefit from this service, simply register online (registration of each guest and payment of the deposit). On the day of arrival, an SMS is sent as soon as the accommodation is available. The online check-in service will gradually be extended to all residences in France.

Forerunner of new services

The Odalys Group encourages its teams to always offer more and more new services to its clients, both in its Odalys Vacances and Campus residences as well as in its Odalys City appart’hotels. This involves the deployment of innovative actions such as the creation of vegetable gardens dedicated to the cultivation of organic fruit and vegetables, the creation of IT fab labs or repair workshops, or the implementation of support courses provided by students residing in our student establishments.
